

## Your 1964-1972 Chevelle Shop Manuals and Parts & Accessories Catalog

1. Click **Start** > **Run** and navigate to (cd drive):\index.html  
..or..
2. Open your web browser and click **File** > **Open** > **Browse** and navigate to (cd drive):\index.html

This DVD is Internet-browser based. Recommended screen resolution set to a minimum of 1024x768 with 1280x1024 or higher being preferred. It has been tested with Internet Explorer 8-11, under Windows 2000, Windows XP Pro w/Service Pack 2 & 3, Windows Vista, Windows 7, Windows 8, and Windows 10 operating systems as well as MACs.

The DVD has also been tested with Google Chrome, Mozilla Firefox, Opera, and Safari browsers. Insure you have a .PDF file program associated with the .PDF file extension.

If you use a pop-up blocker the pop-up windows showing larger photos may not work properly and you may need to disable the feature. Security features in Internet Explorer may also cause the DVD to not operate properly and display a warning concerning Active Content. This can be resolved by allowing active content to be run from CDs. In Internet Explorer, select **Tools** > **Internet Options** then the **Advanced** tab. You must check the box next to "Allow active content from CDs.DVDs to run on My Computer". If you copy the contents of the DVD to your local hard drive then the next box "Allow active content to run in files on My Computer" must be checked. Java must also be enabled.

If you discover an error in an internal link, a photo that does not display, spelling errors, etc. please be as specific as possible about the location when reporting these problems. If there is a problem on an individual page you can right-click the page, select **Properties**, and determine the page name to report the problem.

Thank you again for your purchase and I hope the material presented meets many of your expectations.

Please visit <https://www.chevelled.net/instructions/index.htm> for a review of the CD operating instructions and <https://www.chevelled.net/news/news.htm> for information on updates. There is no need to register your DVD serial number when purchased directly from ChevelleCD.net, your information is automatically added to our database. This DVD contains the latest updates. If you find errors, broken links, or have suggestions to make the DVD better, please contact us through the <https://www.chevelled.net> website.

You may also install the contents to your hard drive for faster response. Create a folder on your PC or MAC and simply copy the files from the DVD to that folder.

## Installation Instructions for downloaded files

There are two file options, one is for an .EXE file that works ONLY with a Windows-based operating system and one for a .ZIP file that will work for both Windows and MACs.

The .EXE file is a self-extracting file for a Windows-based PC that will prompt you for a directory to extract the files to and will create a desktop shortcut when it is complete.

The .ZIP file must be manually extracted and a manual shortcut created. On a MAC the file will download to your Download folder. Go to your Documents folder and create a new folder, say "xx\_Shop\_Manuals" for example where 'xx' is the model year. Copy (or move) the "xx\_Shop\_Manuals.zip" file from the Download folder to the newly created folder. Right-click the "xx Shop Manujals.zip" file and Open with your Archive Utility.app This will unzip the file to this folder. Your Finder view should look like this except it'll will show the folder name you created and the files will be for the "xx\_Shop\_Manuals" files. (Note the example shown below is for my 1966/1967 Chevelle Reference CD but the procedure is the same.)

The screenshot shows a Mac Finder window with a sidebar on the left containing 'Applications', 'Desktop', 'Documents', and a sub-folder '6667v2'. The main pane displays the contents of the '6667v2' folder, which includes sub-folders '66', '67', 'common', and 'styles', and files '66updates.htm', '67updates.htm', 'index.html', and '6667v2.zip'. The '6667v2' folder is selected and highlighted in blue.

The only file you need to run is the "index.html" file. You can double-click the index.html file and your default browser will open the page. You can then bookmark the page for future access.
